...more than just an investment manager
Our Firm

Founded in 1988, Condor Capital is an SEC-registered investment advisor. We strive to be more than just your investment manager by providing a comprehensive range of financial planning services.

We provide our investment management services on a fee-only basis. Our fees are based on the size of our clients’ portfolios, rather than commissions or number of trades, so there is no conflict of interest regarding our investment decisions.

As part of our integrated approach to investment management, we provide you with unlimited and thorough financial planning advice on a complimentary basis.

We pride ourselves on providing wealth management solutions that combine investment management, financial planning, and relationship management services, including consulting with your other advisors, allowing you to streamline your complex financial affairs.

"It requires a great deal of boldness and a great deal of caution to make a great fortune, and when you have it, it requires ten times as much skill to keep it."

-Ralph Waldo Emerson
As part of our investment process at Condor, we take the time to determine your overall investor profile. This includes identifying short-term and long-term goals, risk tolerance, liquidity needs, tax issues, and other special concerns.

We then design an appropriate investment strategy for you to provide diversified exposure to the global equity and fixed income markets.

To ensure a cohesive investment strategy is in place, we can advise on every investment account in your portfolio. This includes brokerage, IRA, trust, 401(k), annuity, stock option, and other investment accounts.

We draw on the expertise of our own investment research team to seek out prevailing market trends and identify investments for your portfolio.

Most accounts are managed on a discretionary basis, which allows our portfolio managers to efficiently execute trades on your behalf. Accounts are typically maintained at a discount brokerage firm to keep trading costs low.

- ADVICE ON ALL INVESTMENT ACCOUNTS
- IN-HOUSE INVESTMENT RESEARCH EXPERTISE

**Investment Philosophy**

Condor offers a number of in-house investment management strategies, using stocks, bonds, mutual funds, and exchange traded funds. We aim to construct diversified equity portfolios with exposure to various investment styles, market capitalization, and geographic region. Bond portfolios are diversified among several different types of fixed income instruments, including bonds of varying maturities and credit qualities.

Depending on your unique requirements, we may utilize one or more of our investment strategies in your portfolio. At times, we may even draw on the investment capabilities of external investment managers if we feel they can add significant value to your portfolio.

As long-term investment managers, we do not believe in timing the market and tend to stay fully invested, which makes asset allocation a paramount decision. Our low turnover approach keeps transaction costs low and tends to provide tax-efficient results.

Our strategies can be customized to suit your unique needs, such as restricting investment in certain areas, accommodating concentrated positions, or even incorporating socially responsible investment vehicles.

- EXCHANGE TRADED FUNDS
- MUTUAL FUNDS

- MUNICIPAL BONDS
